Research Interests: Interactive Narrative, Human-Computer Interaction (HCI), Playable Prototypes, Urban Experience

EDUCATION

Zhejiang University | B.Eng in Urban and Rural Planning; Minor in Landscape Architecture Sep 2021 – Jun 2027

• GPA: 3.73/4.00; Selected Coursework: Urban Design, Applied Psychology, Social Science Research Methods, Applied Statistics.

The University of Tokyo | Exchange Student, USTEP Type U Oct 2025 – Mar 2026

• Conducted course-based research on algorithmic bias in large language models and Generation Z social media behavior.

RESEARCH EXPERIENCE

Research Assistant Intern | Institute of Urban and Rural Planning & Design, Zhejiang University Jul 2026 – Present

• Low-Altitude Economy Research: Synthesized literature and background theoretical frameworks on low-altitude economy integration and urban airspace feasibility.

• Conducted spatial fieldwork across residential and mixed-use complexes in Hangzhou; mapped site constraints for project analysis.

Student Researcher | SRTP, Zhejiang University Mar 2023 – Jun 2024

• Precision Assessment & Equity of PM2.5 Exposure: Investigated spatiotemporal disease burden patterns attributable to ambient air pollution and analyzed key contributing factors.

• Vectorized built-environment metrics and processed individual mobility trajectories to analyze exposure mechanisms and equity.

INTERACTIVE & DESIGN PROJECTS

DigitalFutures 2026 | "An Inflatable Cat" | Cross-Media Narrative Project Jun – Jul 2026

• Developed a cross-media narrative about near-future Shanghai via an interactive website, physical model, and video; coordinated world-building, spatial translation, and user journey.

Public Opinion | Independent Party Card Game & Web Companion Jul – Sep 2026

• Designed a 4–8 player satirical party game translating online disputes and polarization into a group-labeling deduction mechanic.

• Prototyped a companion website for forum-based topic expansion, card generation, and in-person play session moderation.

EnCoded Space 2026 | 3D Narrative Game Demo (Godot) Jul – Aug 2026

• Co-developed a narrative Godot demo in a workshop co-organized by Tsinghua Univ. and 37 Interactive Entertainment; designed UI interactions, managed 3D art assets, and built scenes.

DigitalFutures 2025 | Human-Machine Design Collaboration Jul 2025

• Explored EvoMass and generative AI for massing iteration at a Shanghai Wuyi Road urban regeneration site; contributed to site analysis, client synthesis, and final presentation.

INTERN EXPERIENCE

Jiangshan Xingji | Editorial Intern, Architecture Media Platform Sep 2025 – Present

• Authored theory-oriented articles translating architectural academic research for public audiences (10,000+ views); handled visual layout.

Huawei Technologies | Consumer Management Trainee Jul – Sep 2025

• Analyzed retail conversion and site selection; designed interactive engagement mechanics for campus roadshows across 7 pilot universities.

China IPPR (Hainan) | Project Assistant Intern Dec 2023 – Feb 2024

• Researched vernacular residential practices and materials; co-designed an installation shortlisted for Shanghai DESIGN 100+.

AWARDS

• Third Prize, 2026 WUPENiCity International Competition on Urban Sustainability Reports

• Gold Award, Zhejiang ABC Cup College Students' Innovation Competition (2025)

• Best Project Award, CDAC Mixed Reality Timber Construction Workshop (2024)

SKILLS & LANGUAGES

• **Research:** Literature review, fieldwork, in-depth interviews, spatial analysis, data processing

• **Prototyping:** Godot Engine, basic Next.js / TypeScript, WeChat mini program workflows

• **Design:** AutoCAD, Rhino / Grasshopper, SketchUp, Adobe Creative Cloud, EvoMass, ComfyUI

• **Language:** English (IELTS Academic 6.5); Mandarin Chinese (Native); Japanese (Elementary / N5)
